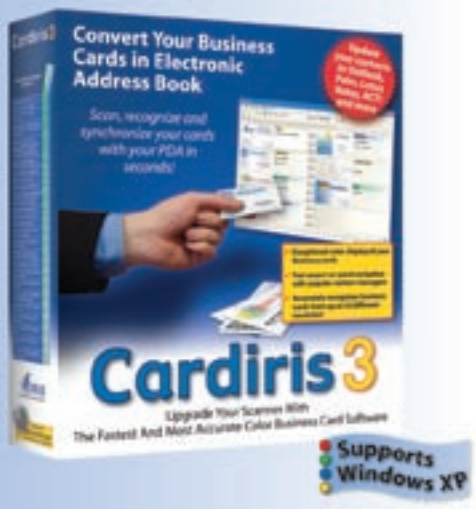
Convert Your Business Cards in Electronic Address Book

Cardiris 3

The best solution to scan, archive, organize and synchronize your contacts!



Cardiris 3 is the new version of I.R.I.S. powerful contact organizer. Very fast and accurate, Cardiris 3 creates automatically electronic contacts from your paper business cards.

With Cardiris 3, you can scan your business cards with any flatbed scanner or with the IRIS Business Card Reader II. The color card images are archived and displayed in an album view. In seconds, all the information they contain are encoded effortlessly in Cardiris 3 database!

Cardiris 3 recognizes business cards from 53 different countries: from North and South America, Eastern and Western Europe, Baltic countries, Greece, Turkey, Russia, Australia and much more with the "other country" option.

A user-friendly interface offers you a simple workflow and allows you to manage a large number of cards. Powerful sort, search and select tools make you find very rapidly your cards: you'll feel very comfortable in the daily management of your contacts.

Very flexible, Cardiris 3 can import contacts from external databases, export your contacts to other contact managers and even synchronize them! In a few clicks you update the content of your electronic address book directly in your pocket PC or in your favorite contact manager such as Outlook, Outlook Express, ACT!, Palm OS, Lotus Notes and GoldMine.

Cardiris 3 Benefits

Easy-to-use

Easily turn your business cards into digital information and automatically create a personal electronic address book you can use instantly!

Quick access to information

No more stacks of paper cards to go through, Cardiris will find your contacts in less than a second

Powerful export and synchronization

Export or synchronize your contacts with your favorite contact manager (Outlook, Outlook Express, Act!, Palm OS, Lotus Notes, GoldMine, Pocket PC, etc.)

Optimize your flatbed scanner and MFP capacity

Scan up to 10 cards at one time. Cardiris automatically crops the images and displays them in a convenient album view

By the maker of the award winning Readiris Pro
